5. But then, you hear Janie whispering something, something that inspires you to try to move one finger, then another, then another... You claw your way out of the snow until your hand pushes through the surface and you hear a voice yell, "Look there! A hand! A survivor!" What are the words that inspire you to fight for your life? (You'll figure out the last letter of the second word on your own.) (pg. 95)
